

## WLR 100

## INFRARED REMOTE CONTROL

**Application**

– for operation of window actuators and actuator groups

The infrared remote control is made of fire retardant polycarbonate and can operate up to 30 actuators or 10 groups of actuators ie. window actuators and electrical accessories (e.g. curtains and blinds).

The remote control is used together with the ventilation keypads WLI.

**Description**

Function of the buttons: OPEN / STOP / CLOSE

From the factory the remote control has been preset for individual or simultaneous operation of up to 30 actuators. It is also possible to operate several actuators in one window individually from the remote control.

From the factory the remote control has been preset so that the actuator will automatically travel to the end-stop after one press of the button. If desired, the remote control can easily be set so that the actuator will run only as long as the button is pressed.

The remote control is with integral switches for setting a security code; the security codes of the remote control and the keypad WLI must be set identically; this is to ensure that the window can only be operated by an infrared remote control with the correct security code.

The remote control is used together with the keypads WLI 110 or WLI 130.

For more information on these products please refer to the corresponding product sheet.

# INFRARED REMOTE CONTROL

Supply voltage	2 x AAA (1.5V) batteries at normal usage the lifetime is expected to be at least one year	
Operating conditions	max. +50°C	
Material	housing buttons	fire retardant polycarbonate according to UL 94-V silicone rubber
Dimension	housing buttons	white (NCS 1000) grey (NCS 3000)
Size	180 x 34 x 16mm (W x H x D)	
Weight	0.14kg	
Operation range	if pointed directly at the keypad (0° operation angle), the remote control can operate a keypad within a range up to 15m. The larger the angle the smaller the operation range (3m range at a 90° angle).	
Delivery includes	remote control with 2 x AAA (1.5V) batteries	
Note	we reserve the rights to make technical changes	

Item	Item no.
Infrared remote control	WLR 100
